

Valero Pembroke Refinery CHP Unit Project Open Days

Valero Pembroke Refinery has submitted proposals for a Combined Heat and Power (CHP) Cogeneration Unit to provide power to the refinery, as well as supplement the refinery's steam demand.

The 45 megawatt unit under review by Valero is expected to result in primary energy savings compared to the separate production of heat and electricity and is also expected to reduce the refinery's operational costs and improve its energy security.

As a Development of National Significance (DNS), Valero has been engaging with local residents and our communities and keeping them up to date with our plans as they develop.

A number of Open Days are also being held so you can find out more about the project.

These Open Days will be held on:

Wednesday, 10th May, 10:30am – 4:30pm

Pater Hall, Lower Street, Pembroke Dock, SA72 6DD

Thursday, 11th May, 10:30am – 4:30pm
